Egypt's
Health Minister Hatem al Gabali

Egyptian
Health Minister Hatem al Gabali announced that the vaccine for the H1N1 virus known swine flu will arrive on 23 October to Egypt, according to Egypt's Independent Newspaper al Masry al Youm

Once the
arrival of vaccines will be the compulsory vaccination of pilgrims according to the instructions and the requirements of the Saudi Arabia Ministry of Health, al Gabali said.

Al Gabali said the Saudi side, sent us requirements to be applied in the case of vaccine availability in any country, where it was to be available in the country, a condition for the Hajj visa, adding that the Saudi authorities reported that in the absence of the vaccine, or the difficulty of providing for the time being, it will be granted a visa for the pilgrims from these countries, provided that such action on the responsibility of their respective countries.

Egypt's Minister said that the World Health Organization's time to accurately determine this vaccine - the 6 weeks of the first group were injected with the restaurant in Australia and China - ending in 21 October, adding that according to the expert of the World Health Organization Fukuda the third week of October, the organization will be sure that there are no side effects of these vaccine.

It came after accusations refer that Drug-industry investigators have uncovered documents exposing an international drug ring, operating from New York City, is behind the H1N1 swine flu fright and vaccination preparations.

Dr. Leonard G. Horowitz and Sherri Kane, an investigative journalist, have released evidence in legal affidavits that leaders of a private global biotechnology "trust" are behind the pandemic flu, including its origin and alleged prevention via vaccinations.

Their documents, being sent by attorneys to the FBI, evidence industrialists are operating a crime ring within the "Partnership for New York City" (PNYC), and are behind the pandemic's creation, media persuasions, vaccination preparations, and health official promotions.

"David Rockefeller's trust, that engages several powerful partners on Wall Street, including media moguls Ruppert Murdoch, Morton Zuckerman, Thomas Glocer, and former Chairman of the Board of Directors of the Federal Reserve Bank of New York, Jerry Speyer, are implicated in advancing global genocide," Dr. Horowitz wrote to FBI directors.

"This 'partnership' controls biotechnology research and development globally. Health commerce internationally is also controlled virtually entirely by this trust that also exercises near complete control over mainstream media to promote/propagandize its products and services for the drug cartel's organized crime.

This trust, in essence, makes or breaks medical and natural healing markets, primarily through the mass media companies and propaganda it wields for social engineering and market building," Dr. Horowitz wrote.

Egypt vaccinates hajj pilgrims against H1N1

For his part, the Egyptian Health Minister al Gabali said Wednesday that Egypt will give swine flu vaccinations to citizens making the hajj pilgrimage to Mecca in Saudi Arabia.

Saudi Arabia says it is prepared to welcome some three million people during the annual hajj to Mecca in late November, and has asked pilgrims to be vaccinated against ordinary flu and H1N1 beforehand.

Egypt, which sends tens of thousands of pilgrims to Mecca, announced in August it would buy five million doses of vaccine, a figure likely to double or even triple in the winter.

The country of 80 million people has reported three deaths related to the virus which it says has infected more than 1,000 people.

Authorities have taken strict measures to contain the spread of swine flu including slaughtering 250,000 pigs in a step that drew heavy criticism and delaying school and university entrance dates by a few weeks.
